CUMULATIVE INDEX VOLUMES 11-20 1977-1984

EDITORS (Toruń)

R. S. Ingarden (Editor-in-Chief)
A. Jamiołkowski
A. Kossakowski
R. Mrugała (Managing Editor)
S. Pruski

EDITORIAL BOARD

H. Araki (Kyoto)
Yu. M. Berezanski (Kiev)
H. J. Borchers (Göttingen)
A. J. Coleman (Kingston, Ontario)
E. B. Davies (London)
H. D. Doebner (Clausthal-Zellerfeld)
G. G. Emch (Rochester, New York)
S. Guiaşu (Bucharest)
A. S. Holevo (Moscow)
A. Jadczyk (Wrocław)
N. G. van Kampen (Utrecht)
A. Kawaguchi (Chigasaki)
J. R. Klauder (Murray Hill, New Jersey)
A. Lichnérowicz (Paris)
G. Ludwig (Marburg)
J. T. Łopuszański (Wrocław)
V. P. Maslov (Moscow)
M. Matsumoto (Kyoto)
K. Maurin (Warsaw)
M. Mączyński (Warsaw)
B. Mielnik (Warsaw)
J. Niederle (Prague)
R. Penrose (Oxford)
F. A. E. Pirani (London)
C. Piron (Genève)
J. Plebański (Mexico City)
J. Rayski (Cracow)
R. Raczka (Warsaw)
J. Rzewuski (Wrocław)
J. Śniatycki (Calgary)
H. Spohn (München)
D. Sternheimer (Dijon)
E. Størmer (Oslo)
L. Streit (Bielefeld)
E. C. G. Sudarshan (Austin, Texas)
W. Thirring (Vienna)
A. Trautman (Warsaw)
A. Uhlmann (Leipzig)
H. Umegaki (Tokyo)
K. Urbanik (Wrocław)
M. G. Velarde (Madrid)
A. Wehrl (Vienna)
S. L. Woronowicz (Warsaw)

CUMULATIVE INDEX OF VOLUMES 11–20

ABBATI, M. C., and A. MANIÀ: Quantum logic and operational quantum mechanics 19 (1984) 383–406
ABŁAMOWICZ, R., J. MOZRZYMAS, Z. OZIEWICZ, and J. RZEWUSKI: Spinor space 14 (1978) 89–100
ADAMCZYK, A., and R. RĄCZKA: New relativistic wave equations associated with indecomposable representations of the Poincaré group 17 (1980) 145–160
AERTS, D.: Construction of a structure which enables to describe the joint system of a classical and a quantum system. 20 (1984) 117–129
ALBERTI, P. M., and A. UHLMANN: A problem relating to positive linear maps on matrix algebras 18 (1980) 163–176
ALBEVERIO, S., and R. HOEGH-KROHN: Local and global Markoff fields . . 19 (1984) 225–248
– *see* EMCH, G. G., S. ALBEVERIO, and J.-P. ECKMANN
ALCANTARA, J., and D. A. DUBIN: States on the current algebra . . . 19 (1984) 13–26
ALICKI, R.: The Markovian master equations for unstable particles 11 (1977) 1–6
–: The theory of open systems in application to unstable particles. . . . 14 (1978) 27–42
AMREIN, W. O., and A. M. BERTHIER: Impossibility of simultaneous localization of wave packets in energy and in configuration space 11 (1977) 123–131
ANGELOPOULOS, E.: Relativistic spin selection rules obtained by SL (3, *R*) symmetry. 11 (1977) 239–258
ARKHIPOV, A. A.: Unitary bounds for multiparticle interaction amplitudes . 20 (1984) 303–332
ARODŹ, H., and J. M. RAYSKI (JR.): Functional approach to the parametric derivatives of renormalized Green's functions with multiple insertions . 15 (1979) 407–416
ASANOW, G. S.: Motion of the rest frame of the electric charge defined by the Finslerian structure of the electromagnetic field. 11 (1977) 221–232
–: Some consequences of the Finslerian structure of the space-time with the absolute parallelism 13 (1978) 13–23
–: Scalar and electromagnetic fields in Finslerian space-time with the absolute parallelism 14 (1978) 237–246
–: New examples of S3-like Finsler spaces. 16 (1979) 329–333
– and E. G. KIRNASOV: On 1-form Finsler spaces. 19 (1984) 303–319
BARUT, A. O., Dynamical group quantization 11 (1977) 401–413
–: De Rham currents, extended singularities of fields and magnetic monopoles 11 (1977) 415–422
BAUMGÄRTEL, H., and M. DEMUTH: Decoupling by a projection 15 (1979) 173–186
BAUMGARTNER, B.: Measure theoretic ergodic theory in quantum mechanics. 15 (1979) 391–398
BELAVKIN, V. P., and P. STASZEWSKI: Conditional entropy in algebraic statistical physics. 20 (1984) 373–384
BELIY, A. G., V. F. KOVALENKO and YU. A. SEMENOV: On the continuity of generalized eigenfunctions of the Schrödinger operator 12 (1977) 307–310
BENENTI, S.: Separable dynamical systems: characterization of separability structures on Riemannian manifolds 12 (1977) 311–316
BERESIN, F. A., and V. S. RETAKH: A method of computing characteristic classes of vector bundles 18 (1980) 363–378

BERTHIER, A. M., *see* AMREIN, W. O.
BERTRAND, J.: Covariant quantum field theories for mass-zero spin-two particles 14 (1978) 101–109
BERZI, V.: On a condition characterizing the Lorentz and Galilei groups. . 11 (1977) 297–310
–: Arveson spectral theory and C^*-algebraic Goldstone-type theorems . . 16 (1979) 293–304
BLEHER, P. M.: Analytic continuation of massless Feynmann amplitudes in the Schwartz space $\mathscr{S}$ 19 (1984) 117–142
BLEULER, K.: Differential geometrical methods in various domains of theoretical physics. 12 (1977) 395–405
BOBKER, D. S.: A quantum neutron diffusion equation and its classical limit 15 (1979) 1–19
BOGUSH, A. A., and F. I. FEDOROV: Finite Lorentz transformations in quantum field theory 11 (1977) 37–52
BORISOV, A. B.: The unitary representations of $CL(4, \boldsymbol{R})$ 13 (1978) 141–147
BOYER, CH. P., and J. F. PLEBAŃSKI: General relativity and G-structures. I. General theory and algebraically degenerate spaces 14 (1978) 111–145
BROADBRIDGE, PH.: Photons as para-fermion composites-limitations 14 (1978) 179–183
BRUNET, M., and P. KRAMER: Semigroups of length increasing transformations 15 (1979) 287–304
–, –: Complex extension of the representation of the symplectic group associated with the canonical commutation relations. 17 (1980) 205–215
BRÜNING, E.: On a generalization of Wick-powers for generalized free-fields in terms of Jacobi-fields 19 (1984) 205–223
BURZLAFF, J.: Canonical quantization of dissipative systems. 16 (1979) 101–110
CAREY, A. L., and K. C. HANNABUSS: Twistor geometry quantisation theory 13 (1978) 199–231
–, J. M. GAFFNEY and C. A. HURST: A C^*-algebra formulation of gauge transformations of the second kind for the electromagnetic field . . . 13 (1978) 419–436
–: Group representations in reproducing kernel Hilbert spaces 14 (1978) 247–259
CASSINELLI, G., and P. TRUINI: Conditional probabilities on orthomodular lattices. 20 (1984) 42–52
CATTANEO, U.: On locally continuous cocycles 12 (1977) 125–132
CEGŁA, W., and B. JANCEWICZ: Representations of relativistic causality structure by an operator density current 11 (1977) 53–63
ČERŇANSKÝ, P.: Thermodynamic limit of Josephson junction 20 (1984) 277–283
CHAKRABARTI, C. G.: Sufficiency and statistical mechanics 16 (1979) 143–145
CHAKRABORTY, C. G., *see* DUTTA, M., and C. G. CHAKRABORTY
CHEN, E.: Entropy and superposition principle 11 (1977) 189–195
–: Markov processes in quantum lattice systems 14 (1978) 207–213
CHOQUET-BRUHAT, Y.: Properties of maximal submanifolds in space-times with compact or open space-like sections 12 (1977) 9–17
CHRISTODOULOU, D., and M. FRANCAVIGLIA: Remarks about the thin sandwich conjecture 11 (1977) 377–382
CISSOKO, M.: On relativistic ferrohydrodynamics 20 (1984) 21–29
CLARKE, C. J. S.: A general framework for cosmological quantum theory . 13 (1978) 369–377
COMBE, PH., R. RODRIGUEZ, G. RIDEAU, and M. SIRUGUGUE-COLLIN: On the cylindrical approximation of the Feynmann path integral 13 (1978) 279–294
CONSTANTINESCU, F., and W. THALHEIMER: Ultradistributions and quantum fields: Fourier-Laplace transforms and boundary values of analytical functions 16 (1979) 167–180
– and B. STRÖTER: Exponential decay of derivatives of covariance operators on the lattice 18 (1980) 379–386

COULLET P., *see* TRESSER, C., and P. COULLET
CRAMPIN, M., L. HODGKIN, P. MCCARTHY, and D. ROBINSON: 2-manifolds of constant curvature, 3-parameter isometry groups and Bäcklund transformations 17 (1980) 373–383
–: Hidden symmetries and Killing tensors 20 (1984) 31–40
CZKWIANIANC, E.: Symmetric semistable measures on R^n and symmetric semistable distribution operators in quantum mechanics 17 (1980) 89–99
CZYŻ, J.: On geometric quantization and its connections with the Maslov theory 15 (1979) 57–97
–: On geometric quantization of compact, complex manifolds 19 (1984) 167–178
DADASHEV, L. A., and V. YU. KULIEV: Uninvertible linear canonical transformations 15 (1979) 187–194
DANIEL, W.: The entropy of observables on quantum logic 19 (1984) 325–334
DAVIES, E. B.: Uniqueness of the standard form of the generator of a quantum dynamical semigroups 17 (1980) 249–255
–: Quantum dynamical semigroups and the neutron diffusion equation . . 11 (1977) 169–188
DEBACKER-MATHOT, Fr.: Spectral properties in a class of operators and group representations in nested Hilbert spaces 11 (1977) 361–375
DEMOEN, B., P. VANHEUVERZWIJN and A. VERBEURE: Completely positive quasi-free maps of the CCR-algebra 15 (1979) 27–39
DEMUTH, M., *see* BAUMGÄRTEL, H., and M. DEMUTH
DOBREV, V. K., and V. B. PETKOVA: Elementary representations and intertwining operators for the group SU*(4) 13 (1978) 233–277
DRÜHL, K.: On the classical limit of relativistic quantum theories with arbitrary spin 20 (1984) 11–19
DUBIN, D. A., *see* ALCANTARA, J., and D. A. DUBIN
DUTTA, M., and C. G. CHAKRABORTY: Statistical thermodynamics from the point of view of statistical theory of estimation 13 (1978) 129–139
DUVAL, CH., and H. P. KÜNZLE: Dynamics of continua and particles from general covariance of Newtonian gravitation theory 13 (1978) 351–368
DVUREČENSKIJ, A., and S. PULMANNOVÁ: Connection between joint distribution and compatibility 19 (1984) 349–359
– *see* PULMANNOVA, S., and A. DVUREČENSKIJ
ECKMANN, J.-P., *see* EMCH, G. G., S. ALBEVERIO, and J.-P. ECKMANN
EGANOVA, I. A.: N-point functions and low-energy scattering by N centers . 20 (1984) 217–233
– and M. I. SHIROKOV: Orthomatrices and cotonions 20 (1984) 1–10
EMCH, G. G., S. ALBEVERIO, and J.-P. ECKMANN: Quasi-free generalized K-flows 13 (1978) 73–85
- and J. C. VARILLY: Some remarks on dilating semigroups of completely positive mappings 18 (1980) 97–102
ELLIOTT, G. A.: On extending the trace as a linear functional 15 (1979) 199–203
ENGLISH, H.: Remarks on Mc Bryan's convergence proof for $(\alpha^{-4}(\cos(\alpha\varphi)-1+\alpha^2\varphi^2/2))_2$-quantum fields 18 (1980) 387–397
ENSS, V.: Renormalization group limits for Wick polynomials of Gaussian processes 13 (1978) 87–99
ERDAHL, R. M., and H. GRUDZIŃSKI: Spectral properties of cones of approximately representable reduced density matrices 14 (1978) 405–418
–: Two algorithms for the lower bound method of reduced density matrix theory 15 (1979) 147–162

EVANS, D. E., and T. SUND: Spectral subspaces for compact actions	17 (1980)	299–308
EXNER, P.: Bounded energy approximation to an unstable quantum system	17 (1980)	275–285
–: Generalized Bargmann inequalities	19 (1984)	249–255
FAIRÉN, V., and M. G. VELARDE: Dissipative structures in a non linear reaction-diffusion model with forward inhibition. Stability of secondary multiple steady states	16 (1979)	421–432
FANNES, M., J. V. PULÉ, and A. VERBEURE: Integral representation of the classical KMS-states for quasi-free evolutions	11 (1977)	383–388
FEDOROV, F. I., *see* BOGUSH, A. A., and F. I. FEDOROV		
FENSKE, C. C., *see* KRÖGER, H., and C. C. FENSKE		
FIEDLER, B., and R. SCHIMMING: Exact solutions of the Bach field equations of general relativity	17 (1980)	15–36
FILIPOWSKI, H., M. KRUK, and J. MOZRZYMAS: Structure constants of algebras of projective representations of point groups	15 (1979)	329–360
FISCHER, H. R., and F. L. WILLIAMS: Note on duality on polarized symplectic manifolds	20 (1984)	357–363
FORGER, M.: Gauge theories, instantons and algebraic geometry	16 (1979)	359–384
FRANCAVIGLIA, M., *see* CHRISTODOULOU, D., and M. FRANCAVIGLIA		
FRANKE, A.: An axiomatic scheme more general than quantum theory	18 (1980)	411–431
FRIGERIO, A., C. NOVELLONE, and M. VERRI: Master equation treatment of the singular reservoir limit	12 (1977)	279–284
– *see* GORINI, V., A. FRIGERIO, M. VERRI, A. KOSSAKOWSKI, and E. C. G. SUDARSHAN		
FRONSDAL, C.: Some ideas about quantization	15 (1979)	111–145
FULP, R. O., and J. A. MARLIN: Function groups associated with constraint submanifolds	18 (1980)	295–301
FUSHCHICH, V. I., A. G. NIKITIN, and V. V. SALOGUB: On the non-relativistic motion equations in the Hamiltonian form	13 (1978)	175–185
GAFFNEY, J. M., *see* CAREY, A. L., J. M. GAFFNEY, and C. A. HURST		
GARBACZEWSKI, P., and Z. POPOWICZ: Representations of the CAR generated by the representations of the CCR. III. Non-Fock extension	11 (1977)	73–80
GARCIA, P. L.: Critical principal connections and gauge-invariance	13 (1978)	337–344
GARCZYŃSKI, W., and K. URBANOWSKI: Discussion of the Królikowski–Rzewuski equation for projection of a state-vector onto one-dimensional subspace of Hilbert space	18 (1980)	137–145
GARSEVANISHVILI, V.R., and D. G. MIRIANASHVILI: Moving deuterons and the relativistic three-body problem	11 (1977)	89–95
GERELLE, E. G. R.: Selection maps for quantum logics: Applications to the classification of elementary particles	12 (1977)	141–150
GESZTESY, F., and H. G. LATAL: Renormalization, Nelson's symmetry and energy densities in a field theory with quadratic interactions	14 (1978)	215–224
– and L. PITTNER: A generalization of the virial theorem for strongly singular potentials	18 (1980)	149–162
–, –: Two-body scattering for Schrödinger operators involving zero-range interactions	19 (1984)	143–154
–: On non-degenerate ground states for Schrödinger operators	20 (1984)	93–109
GIAMBO, S., and E. TURRISI: On the propagation of infinitesimal discontinuities in relativistic hypoelasticity	19 (1984)	293–302
GIELERAK, R.: Local operator products for some nonpolynomial interactions	17 (1980)	1–14

–: On the Borchers class of the two-dimensional sine-Gordon models	17 (1980)	41–54
GODOWSKI, R. M.: Commutativity in orthomodular posets	18 (1980)	347–351
GOŁĘBIOWSKA-LASOTA, A. A.: Affinely-rigid motion in amorphous spaces	11 (1977)	165–168
GORINI, V., A. FRIGERIO, M. VERRI, A. KOSSAKOWSKI, and E. C. G. SUDARSHAN: Properties of quantum Markovian equations	13 (1978)	149–173
GÖRNITZ, Th., G. MOTZ, D. ROBASCHIK, and E. WIECZOREK: Connection between light cone singularities and the asymptotic behaviour of the moments of the structure functions	11 (1977)	389–399
GRABOWSKI, M., and P. STASZEWSKI: On continuity properties of the entropy of an observable	11 (1977)	233–237
–: A-entropy for spectrally absolutely continuous observables	14 (1978)	377–384
–: Wehrl-Lieb's inequality for entropy and the uncertainty relation	20 (1984)	153–155
GRENSING, G.: Symmetric and traceless tensors on Minkowski space	14 (1978)	19–26
GRUDZIŃSKI, H., *see* ERDAHL, R. M., and H. GRUDZIŃSKI		
– *see* PRUSKI, S., and H. GRUDZIŃSKI		
GUDDER, S., and J.-P. MARCHAND: Conditional expectations on von Neumann algebras: A new approach	12 (1977)	317–329
–: Axiomatic operational quantum mechanics	16 (1979)	147–166
–: Statistical inference in quantum mechanics	17 (1980)	265–274
GUSEV, E.: Weak convergence of wave values in quantum Heisenberg model	18 (1980)	399–409
GUZ, W.: Axioms for statistical physical theories and *GL*-spaces	12 (1977)	151–167
–: Spaces of the type GM and GL. Basic properties	12 (1977)	285–299
–: Pure operations and the covering law	16 (1979)	125–141
–: A non-symmetric transition probability in quantum mechanics	17 (1980)	385–400
HABA, E.: Remarks on the stochastic process corresponding to $(1/\varphi^2)_1$ interaction	18 (1980)	257–275
HADJIIVANOV, L. K., and D. Ts. STOYANOV: On the free scalar massless field in two-dimensional space-time	15 (1979)	361–373
–, S. G. MIKHOV, and D. T. STOYANOV: On the conformal transformations in the massless Thirring model	16 (1979)	89–100
HAŃĆKOWIAK, J.: A space-time functional formalism for classical field equations	17 (1980)	313–332
HANNABUSS, K. C., *see* CAREY, A. L., and K. C. HANNABUS		
HANSEN, F.: Quantum mechanics in phase space	19 (1984)	361–381
HAVLIČEK, M., and W. LASSNER: Matrix canonical realizations of the Lie algebra $u(p, q)$	12 (1977)	1–8
HESS, H., and D. KRAUSSNER: Lifting classes of principal bundles	18 (1980)	317–345
HODGKIN, L., see CRAMPIN, M., L. HODGKIN, P. MCCARTHY, and D. ROBINSON		
HØEGH-KROHN, R., *see* ALBEVERIO, S., and R. HØEGH-KROHN		
HOFFMANN, G.: The closure of cones in the algebra of test functions	13 (1978)	187–197
–: On the existence of quantum fields in space-time dimension 4	18 (1980)	231–242
HOLEVO, A. S.: Commutation superoperator of a state and its applications to the noncommutative statistics	12 (1977)	251–271
–: Problems in the mathematical theory of quantum communication channels	12 (1977)	273–278
–: Estimation of the shift parameters of quantum state	13 (1978)	379–399
–: Covariant measurements and uncertainty relations	16 (1979)	385–400
HONGOH, M.: A note on the SU(2) Bloch coherent states	13 (1978)	305–309
HRUBÝ, J., and J. SOUČEK: Superspace as a fibre space	14 (1978)	15–18

HUDSON, R. L.: Translation-invariant traces and Fourier analysis on multiplier representation of vector groups 13 (1978) 327–335
–, M. D. WILKINSON, and S. N. PECK: Fourier analysis on multiplier representations of locally compact Abelian groups 19 (1984) 91–100
HUGHES, T. J. R., and J. E. MARSDEN: Some applications of geometry in continuum mechanics 12 (1977) 35–44
HUGHSTON, L. P., and M. SHEPPARD: On the magnetic moments of hadrons 18 (1980) 53–66
